SAMPLE PRESENTATION ANSWERS:

Create a PowerPoint Presentation for IA product for final approval.

1. Who is your client and what is his/her requirements?

Mr Stubbs requested (see interview appendix 1) a GUI be developed for the new system which would require users to login and allow them to create, modify and delete jobs. Users should also be able to specify how often jobs are to be completed and on which days they cannot be done. Additionally, Mr Stubbs has requested that all data be serialized and that a calendar be implemented indicating which days he has work.

2. Demonstration of your final product using GUIs.

3. Name of front end and back end software
   Front end - NetBeans and Back end – Java DB / MySQL etc.
4. Details of tables, datatypes and their descriptions.

Table: **STUDENTS**

Field name	Data type	Description
Student_ID	Number	Uniquely identifies student
Family	Text	Family name
Given	Text	Given name
Street	Text	Street address
Town	Text	Town

Table: **DVDs**

Field name	Data type	Description
DVD_ID	AutoNumber	Uniquely identifies DVD
Title	Text	Title of DVD
Genre	Text	Category of DVD
Rating	Text	Coded censorship rating

5. Why you are interested to develop this product.

The reason why I choose to combine the game and math is that I believe thus can provide good reasons for Eric to play games in his spare time and avoid the arguments with his parents. Besides, solutions of classical questions are provided in this game and these would help Eric to reinforce his understanding of the knowledges he learned in school.
